SUMMARY

Aspiring Computer Science Engineer specializing in Full-Stack Web Development utilizing the MERN stack. Passionate about building responsive user interfaces, developing scalable RESTful APIs, and implementing real-time features to deliver seamless user experiences.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++, HTML5/CSS3, SQL

Web Development: React.js, Node.js, Express.js, MongoDB, REST APIs, WebSockets

Libraries & Frameworks: Redux, React Hook Form, Axios, Tailwind CSS, Bootstrap

Tools & Concepts: Git/GitHub, VS Code, Responsive Design, OOPs, Prompt Engineering

PROJECTS

Real-Time Chat Application (Freelance Project) | MongoDB, Express.js, React.js, Node.js, Socket.io, Tailwind CSS

- Engineered and deployed a full-stack real-time messaging solution for a client, enabling instant text communication and dynamic active-user status tracking.
- Optimized backend MongoDB queries and implemented secure user authentication, reducing message delivery latency and improving data handling efficiency.

Women Safety AI Application | React.js, Tailwind CSS, MediaRecorder API, Node.js, Express

- Developed an AI safety dashboard with a real-time emergency SOS trigger and live location tracking.
- Integrated MediaRecorder API for automated, secure video and evidence logging during critical distress alerts.
- GitHub Repository: <https://github.com/ankur6691/women-safety-ai-system>

EDUCATION

B.Tech(CSE) | Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore

- Batch: 2023 - 2027 | Current CGPA: 9.3/10

HONORS & ACHIEVEMENTS

Technical Assessments: Successfully cleared national-level employability and technical aptitude assessments conducted via Pod.ai platform.

Cloud Infrastructure: Actively participated in cloud computing foundational challenges, gaining hands-on experience with Virtual Machines (VMs) and Google Cloud Shell.
