SUMMARY

Final-year B.Tech CSE student with 1+ years of practical experience in full-stack web development using the MERN stack. Proficient in architecting scalable RESTful APIs, optimizing frontend performance, and applying core software engineering principles to build robust SaaS applications. Enthusiastic about continuous learning and problem-solving through daily data structures and algorithms practice.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3, SQL
- **Frontend:** React.js, Redux, Tailwind CSS, Bootstrap
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, WebSockets
- **Databases:** MongoDB, MySQL
- **Core CS Concepts:** Data Structures & Algorithms (DSA), OOPs, DBMS, Operating Systems
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, foundational Cloud/AI concepts

EXPERIENCE

Full-Stack Developer Intern | *Mindcoders* | Indore, MP

October 2025 – February 2026

- **Developed and deployed** responsive web features using React.js and Tailwind CSS, improving user interface load time by 15%.
- **Built and optimized** scalable RESTful APIs with Node.js and Express.js, integrating MongoDB for efficient data storage and retrieval.
- **Collaborated with senior developers** to debug frontend applications, ensuring cross-browser compatibility and smooth user experience.

Freelance Full-Stack Developer | *Self-Employed* | Remote

February 2025 – Present

- **Designed and developed** custom web applications for various clients using React.js, Node.js, and MongoDB, ensuring mobile responsiveness and high performance.
- **Gathered client requirements**, created project timelines, and delivered clean, maintainable code within specified deadlines.
- **Integrated third-party APIs** and state management tools like Redux to build smooth, scalable functionalities based on client business needs.

PROJECTS

SaaS Restaurant POS & Billing System | *React.js, Node.js, Express.js, MongoDB, Redux*

- **Developed and commercialized** an end-to-end restaurant management and dynamic billing platform inspired by Petpooja, featuring complex inventory tracking and Role-Based Access Control (RBAC).
- **Conducted on-field market research** by pitching to 20+ local restaurants to analyze operations, gather feature feedback, and map real-world user pain points into software requirements.
- **Successfully deployed and onboarded** an active local restaurant as a live client, managing their daily transactional data and menu configurations with zero downtime.

Claritas – Multi-Tenant School Management SaaS Platform | *MERN Stack, Redux, ExcelJS, JWT*

- **Architected and developed a full-stack SaaS platform** featuring multi-role access control for Admin, Principal, Teacher, and Students (Classes 10, 11, 12 with stream segregation).
- **Engineered a centralized Admin Dashboard** to fully control system configurations, manage institutional data, and supervise granular role-based permissions dynamically.
- **Implemented an automated bulk-import feature** utilizing Excel sheet parsing, allowing admins to upload institutional records and auto-populate MongoDB collections instantly with 100% data accuracy.
- **Optimized backend schema and state management** to ensure lag-free rendering of real-time analytical dashboards for teachers and principals handling large-scale student metrics.

EDUCATION

B.Tech in Computer Science and Engineering | *Shri Vaishnav Vidyapeeth Vishwavidyalaya* | Indore, MP

• *Expected Graduation: June 2027* | **CGPA: 8.69 / 10.0**
